Summary

Backend .NET Developer and Computer Science graduate with hands-on experience developing scalable web applications and RESTful APIs using C#, ASP.NET Core, Entity Framework Core, and SQL Server. Built multiple academic, freelance, and real-world projects while applying Clean Architecture, SOLID principles, and modern software engineering practices. Passionate about designing secure, maintainable, and high-quality backend systems with a strong focus on performance, scalability, and clean code.

Education

Fayoum University, Faculty of Computers and Artificial Intelligence Graduated – Jun 2026

- Bachelor of Computer Science
- GPA: **3.69/4.0 (Excellent)**
- Graduation Project: **Excellent with Honors**
- **Relevant Coursework:** Software Engineering, Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Object-Oriented Programming, and Distributed Systems.

Experience

Information Technology Institute (ITI) Jul 2025 – Aug 2025

Full Stack .NET Trainee

- Developed an Academy Management System using ASP.NET MVC, Entity Framework Core, and SQL Server.
- Designed and implemented role-based access control for administrators, instructors, and students.
- Created normalized database schemas and optimized SQL queries to support academic management workflows.

Digital Egypt Pioneers Initiative (DEPI) Jul 2025 – Jan 2026

Full Stack .NET Developer Trainee

- Completed an intensive six-month training program focused on ASP.NET Core, Entity Framework Core, SQL Server, and modern software engineering practices.
- Built backend services and RESTful APIs following Clean Architecture, SOLID principles, and design patterns.
- Led backend development for the EduGate project, which won **1st Place** in the DEPI E-Learning Track and ranked among the **Top 5 Mega Projects** nationwide.

Projects

WallsShop – Furniture E-Commerce Platform [GitHub](#) | [Live Demo](#)

- Developed a scalable e-commerce backend using ASP.NET Core, Entity Framework Core, and Clean Architecture.
- Implemented JWT authentication and role-based authorization using ASP.NET Core Identity.
- Designed a bilingual product management system supporting Arabic and English localization.

Smart Warehouse & POS Management System (ERP/POS) [GitHub](#) | [Live Demo](#)

Demo Password: 0000

- Developed an ERP backend for inventory, sales, purchasing, and financial management using ASP.NET Core.
- Implemented transactional workflows with Entity Framework Core to ensure data consistency.
- Built reusable middleware and centralized exception handling for reliable API responses.

Be Positive – Blood Donation Platform *Graduation Project – Excellent with Honors* [GitHub](#)

- Developed a location-aware blood donation platform connecting hospitals with compatible nearby donors.
- Implemented real-time communication using SignalR and background job scheduling with Hangfire.
- Applied role-based authorization to secure access across hospitals, donors, and administrators.

EduGate – E-Learning & Virtual Labs Platform ★ *1st Place – DEPI E-Learning Track* [GitHub](#)

- Led backend development for a 5-member team, designing the backend architecture and relational database.
- Developed secure RESTful APIs with JWT authentication and multi-role authorization.
- Optimized database queries and API performance to support real-time academic dashboards.

Honors & Awards

Certificate of Recognition – Top Performing Student <i>Digital Egypt Pioneers Initiative (DEPI), MCIT</i>	Dec 2025
---	----------

Certifications

Full Stack .NET Web Developer <i>Digital Egypt Pioneers Initiative (DEPI), MCIT</i>	Dec 2025
---	----------

Business English Track (Round 3) <i>OTO Courses – Sponsored by DEPI, MCIT</i>	Dec 2025
---	----------

Skills

Programming Languages: C#, SQL, C++ , Python

Backend Development: ASP.NET Core Web API, ASP.NET MVC, Entity Framework Core, LINQ, SignalR, Hangfire

Database: Microsoft SQL Server, Database Design, T-SQL, SQL Transactions, Query Optimization

Software Engineering: Clean Architecture, SOLID Principles, Repository Pattern, Unit of Work, Dependency Injection, RESTful APIs, Custom Middleware, Global Exception Handling

Security: JWT Authentication, ASP.NET Core Identity, Role-Based Access Control (RBAC)

Tools: Git, GitHub, Postman, Swagger/OpenAPI, Docker, IIS, Visual Studio

Languages: Arabic (Native), English (Professional Working Proficiency)
